POWER ................................................................. 3
BOILERS .............................................................. 3
COAL HANDLING .................................................. 3
  Equipment ......................................................... 3
  Fundamentals ................................................... 3
  Moving .............................................................. 3
  Transport ......................................................... 3
COMBINED CYCLE .................................................. 3
COMBUSTION TURBINE ................................. 3
CONDENSERS ........................................................ 3
ENVIRONMENTAL PROTECTION .................. 3
FURNACES ............................................................. 3
HEAT EXCHANGERS ........................................ 3
MECHANICAL MAINTENANCE ..................... 3
POWER PLANT OPERATION ......................... 3
PROCESS EQUIPMENT & OPERATIONS .......... 4
TURBINES .......................................................... 4
WATER TREATMENT ............................................. 4
UTILITIES ............................................................. 4
OVERHEAD LINE ............................................... 4
RIGGING (ITD) ..................................................... 4
T & D CONSTRUCTION ........................................ 4
T & D DISTRIBUTION .......................................... 4
T & D EQUIPMENT ............................................. 4
T & D MAINTENANCE ......................................... 5
T & D SAFETY .................................................... 5
T & D Systems and Theory ......................... 5
UNDERGROUND LINE/CABLE ..................... 5
### BOILERS
- Analysis of Boiler Efficiency
- Boiler Efficiency 1: Air Heaters and Preheaters
- Boiler Efficiency 2: Oil and Gas Fired Furnaces
- Boiler Efficiency 2: Windboxes, Burners, and the Furnace
- Boiler Efficiency 3: Superheaters, Reheaters, and the Economizer
- Boiler Fundamentals
- Boiler Instruments and Controls
- Boiler Technology
- Boilers: Basic Principles and Types
- Boilers: Combustion, Water, and Steam
- Efficient Boiler Operation
- Efficient Operation of Oil and Gas Fired Boilers
- Feedwater Heater Efficiency
- Power Plant Boilers: Abnormal Conditions and Emergencies
- Power Plant Boilers: Combustion and Operation
- Power Plant Boilers: Normal Operations
- Power Plant Boilers: Startup and Shutdown
- Power Plant Boilers: Water and Steam

### COAL HANDLING
- Equipment
  - Ash Handling
  - Auxiliary Equipment
  - Car Dumpers
  - Coal Preparation Equipment
  - Control Equipment
  - Conveyors
  - Dust Control
  - Dust Control Equipment, Part 1
  - Dust Control Equipment, Part 2
  - Handling Wet and Frozen Coal
  - Stackers
  - Trippers

- Fundamentals
  - Coal Handling Overview, Part 1
  - Coal Handling Overview, Part 2
  - Coal Handling Overview, Part 3

- Moving
  - Bulldozers
  - Coal Pile Management
  - Coal Yard Maintenance

### TRANSPORT
- Barge Unloading
- Rail Yard Operations

### COMBINED CYCLE
- Combined Cycle: Abnormal Operations
- Combined Cycle: Distributed Control Systems
- Combined Cycle: Heat Recovery Steam Generators
- Combined Cycle: Normal Operations

### COMBUSTION TURBINE
- Combustion Turbine: Abnormal Operations
- Combustion Turbine: Components
- Combustion Turbine: Normal Operations
- Combustion Turbine: Principles
- Combustion Turbine: Support Systems, Part 1
- Combustion Turbine: Support Systems, Part 2

### CONDENSERS
- Condenser Efficiency
- Efficient Condenser Operation

### ENVIRONMENTAL PROTECTION
- Environmental Protection Systems - Air Pollution
- Environmental Protection Systems - Water Pollution

### FURNACES
- Furnace Fundamentals
- Furnace Introduction
- Furnaces: Operating Conditions
- Furnaces: Startup and Shutdown

### HEAT EXCHANGERS
- Heat Exchangers: Introduction

### MECHANICAL MAINTENANCE
- Pumps: Basic Types and Operation

### POWER PLANT OPERATION
- Cycle Efficiency
- Efficient Power Plant Operation
- Electrical Energy and Power
- Introduction to Heat Rate Improvement
- Power Plant: Condensate and Feedwater System
- Power Plant: Condenser and Circulating Water
- Power Plant Efficiency: Problems and Analysis
- Power Plant Operation: Safety and Pollution Control
- Power Plant: Power & Energy
- Power Plant: Power Generation
- Power Plant Protection: Boiler and Turbine Protections
- Power Plant Protection: Fundamentals
- Power Plant Protection: Integrated Systems
- Power Plant: Steam Cycle
- Power Plant: Steam Systems
- Power Plant Systems: Condensate and Feedwater Systems
- Power Plant Thermodynamics
- Principles of Heat Transfer

PROCESS EQUIPMENT & OPERATIONS
- Operator Responsibilities: Plant Production and Safety

TURBINES
- Analysis of Turbine Efficiency
- Power Plant Turbines: Bearings and Operation
- Power Plant Turbines: Steam Flow
- Turbine Efficiency, Part 1
- Turbine Efficiency, Part 2
- Turbine Efficiency, Part 3

WATER TREATMENT
- Water Treatment: Water for Plant Systems, Part 1
- Water Treatment: Water for Plant Systems, Part 2

UTILITIES

OVERHEAD LINE
- 34.5 KV Rubber Glove Work
- Climbing Steel Poles and Towers
- Climbing Wooden Poles
- Overhead Distribution Systems
- Overhead Troubleshooting, Part 1
- Overhead Troubleshooting, Part 2 - Emergency Conditions
- Pole Framing and Guying
- Pole Top Equipment & Replacement, Part 1
- Pole Top Equipment & Replacement, Part 2
- Pole Top Transformer Replacement
- Transformer Connections, Part 1
- Transformer Connections, Part 2
- Transformer Troubleshooting
- Transmission
- Transmission Line Installation
- Transmission Line Repair - Bare Hand Method
- Transmission Line Repair - Hot Sticks
- Transmission Structures
- Tree Trimming, Part 1
- Tree Trimming, Part 2
- Troubleshooting Overhead Lines
- Working on De-energized Transmission Lines
- Working on Distribution Poles

RIGGING (ITD)
- Advanced Rigging - Transmission & Distribution
- Rigging for High Voltage Line Work
- Rigging, Part 1
- Rigging, Part 2

T & D CONSTRUCTION
- Series and Street Lighting
- Service Installation
- Setting and Replacing Poles
- Temporary Structures

T & D DISTRIBUTION
- Distribution
- Distribution Line Installation and Removal
- Distribution Line Repair - Gloves
- Distribution Line Repair - Hot Sticks
- Distribution Line Replacement

T & D EQUIPMENT
- Bucket Trucks, Part 1
- Bucket Trucks, Part 2
- Hydraulic Derricks
- Material Handling Bucket Trucks
- Mobile Hydraulic Systems
T & D MAINTENANCE
- Care and Testing of Tools and Equipment
- Compressors and Pneumatic Tools
- Hydraulic Hand Tools, Part 1
- Hydraulic Hand Tools, Part 2
- Power Quality and Reliability
- System Protection and Monitoring

T & D SAFETY
- Distribution Line Safety
- Safe Bucket Truck Operations
- Safety in Overhead Line Maintenance
- Safety in Substations and Switchyards
- Safety in Transmission and Distribution Maintenance
- Safety in Underground Line Maintenance
- Transmission Line Safety

T & D Systems and Theory
- High Voltage AC Power, Part 1
- High Voltage AC Power, Part 2
- Introduction to Smart Grid
- Introduction to Transmission and Distribution Systems
- Multiple Street Lighting Systems
- Reading Electrical System Diagrams, Part 1
- Reading Electrical System Diagrams, Part 2
- Series and Street Lighting
- Substations and Switchyards

UNDERGROUND LINE/CABLE
- Cable Fault Locating, Part 1 (Radar)
- Cable Fault Locating, Part 2 (Radar)
- Cable Fault Location, Part 1
- Cable Fault Location, Part 2
- Cable Splicing, Part 1
- Cable Splicing, Part 2
- Cable Terminations
- Pad-Mounted Transformers and Switchgear
- Underground Cable Installation
- Underground Conduit
- Underground Residential Distribution Systems
- URD Transformers
- URD Troubleshooting
- Using Line Test Equipment
